

PROPOSAL
Procedure – Reigning In Corporations.
Draft 1

TO: EscaRosa Train Wreck Preppers

SRC.US

From: Jim Costa

Date: Feb. 22, 2026

The Problem:

How can a new County Assembly reign in a giant corporation doing business in their county?

Facts & Assumptions:

- A) County Assemblies and De Jure Grand Juries have not been used since 1871 in the United States, under Common Law. A lot of their accepted practices have been forgotten or removed from our attention.
- B) This Procedure is dependent on **Proposal - Strategy For Assembly To Reign In Large Corporations**. It suggests things to consider before taking up the task and helps vision the success of the effort.
- C) The most important step is the Complaint itself. It would be preferable if made by one with research and knowledge of the problem, along with the passion to insure its success in creating change. Consider a co-complainant if necessary to gain such a person.

This person should seek out others who have had a go at attempting change on the same complaint, especially by another County Assembly in the U.S.

- D) **Understand the Zeitgeist that corporation is operating in** at time of the formal Complaint. Realize the possibility that the complaint may be the “straw that breaks the Camel’s back”.

Would the county be in a better place if that Corporation died completely rather than helping residents locate current product replacements elsewhere?

Should we lose all the corporations products over just one product?

- E) Recognize the **Zeitgeist impact on the Corporation’s current Business plan**. Do they need your push or should you wait?
- F) Understand and **prioritize all successful outcomes available**, leaving room for negotiation. Have a person/team assigned to approve negotiation.

- G) **Unanswered Question:** Which comes first, the Complaint or the desire to complain?
- H) Who should assign a level for **expected time for successful resolution** of an indictment?
(Grand Jury, Complainant or Assigned Person/Team?)

Plan

- 1) Receive the Complaint when it is ready to be presented for action.
- 2) Convene a De Jure Grand Jury.
- 3) If indictment is awarded, consider allowing the jury to **suggest** variable remedies from a pick list.
This optional step can save the county from polling residents for a recommendation.
- 4) Turn the indictment and recommendations over to the County Prosecutor for investigation and prosecution if warranted.

Costs May require research costs.
 May require expert witnesses.
 May require surveying residents.
 May require future costs in sharing work products with other Assemblies.
